Package 3: Focal Complete Speaker Upgrade- front and rear Focal sound without an amplifier				
Package 2 takes the same high-efficiency Access front stage and adds matching Focal 165 AC rear coaxial speakers.				
Keeping the front and rear speakers within the same Focal family helps maintain a consistent sound character throughout the cabin.				
This package is best suited to customers wanting a complete front and rear speaker upgrade while retaining a simple system powered directly from the head unit. This is a great choice for someone who wants the entire cabin upgraded without moving into dedicated amplification.

Focal Access speakers:

The Focal Access range is designed and engineered by Focal in France.

The 165 AS has a sensitivity of approximately 91dB, which is one of the reasons we selected it for this package. It performs efficiently from a head unit and does not require an external amplifier to provide a worthwhile upgrade.
